

METAL CATALYZER Z33 VQ35HR

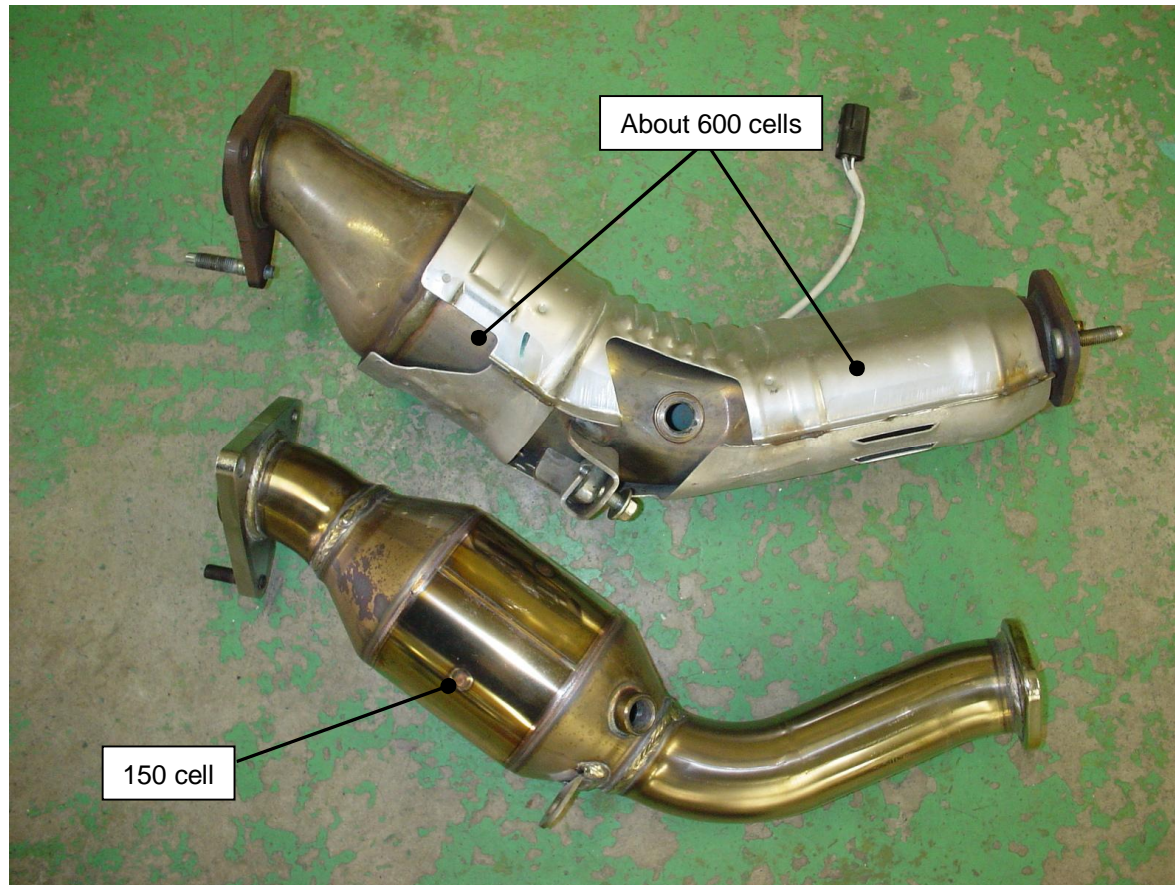

Code No. : 33005-AN004

1. Product information

- Basic design is the same as “33005-AN003 For Z33 VQ35DE”.
- Although stock catalytic converter has two each cells, HKS' product clears Japanese exhaust gas regulations with one each cells.
- With HIPERMAX III, there is 90mm road clearance.
- With a 150 cell catalytic converter, horsepower and response will be improved. The VQ engine will run smoothly from low rpm.

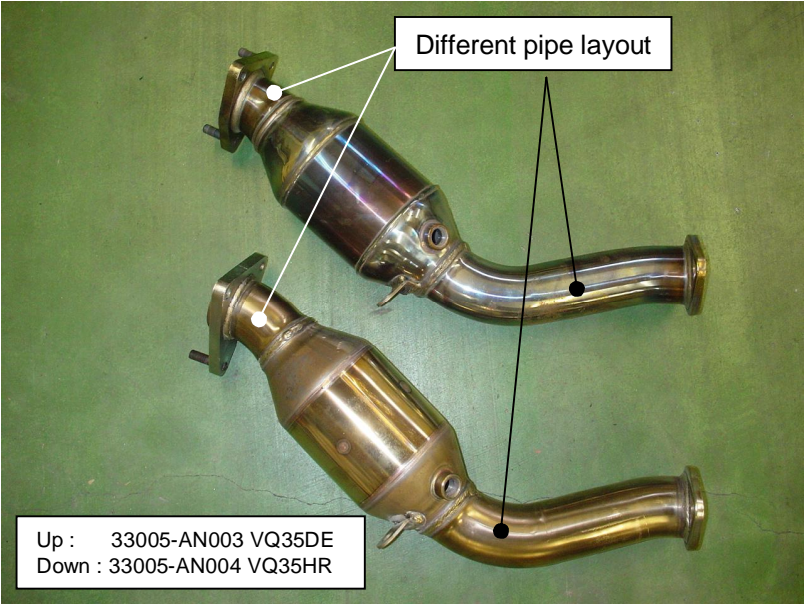

Comparison with stock catalytic converter

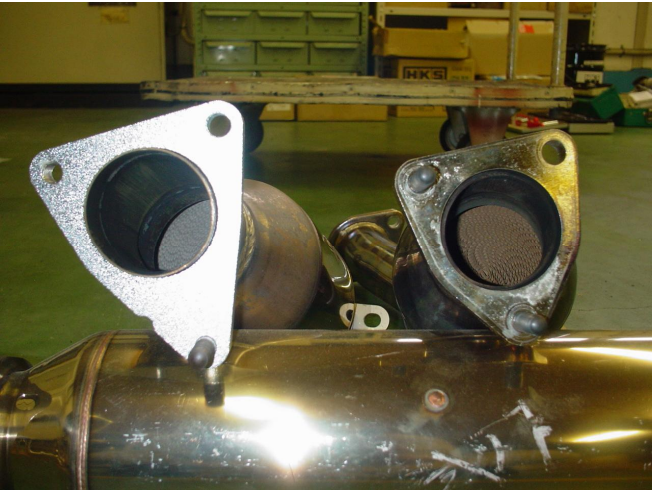

- Stock Cat. converter 600 cells x 2. HKS Cat. 150 cells x 1
- Diameter of flange 65 (Both stock and HKS)

Difference from 33005-AN003 For VQ35DE

- Layout of pipe and location of catalytic converter is different. (Total length is the same)
- Shape of exhaust manifold side flange is different.
- Shape of exhaust manifold side gasket is different. (Ring gasket type for VQ35HR.)

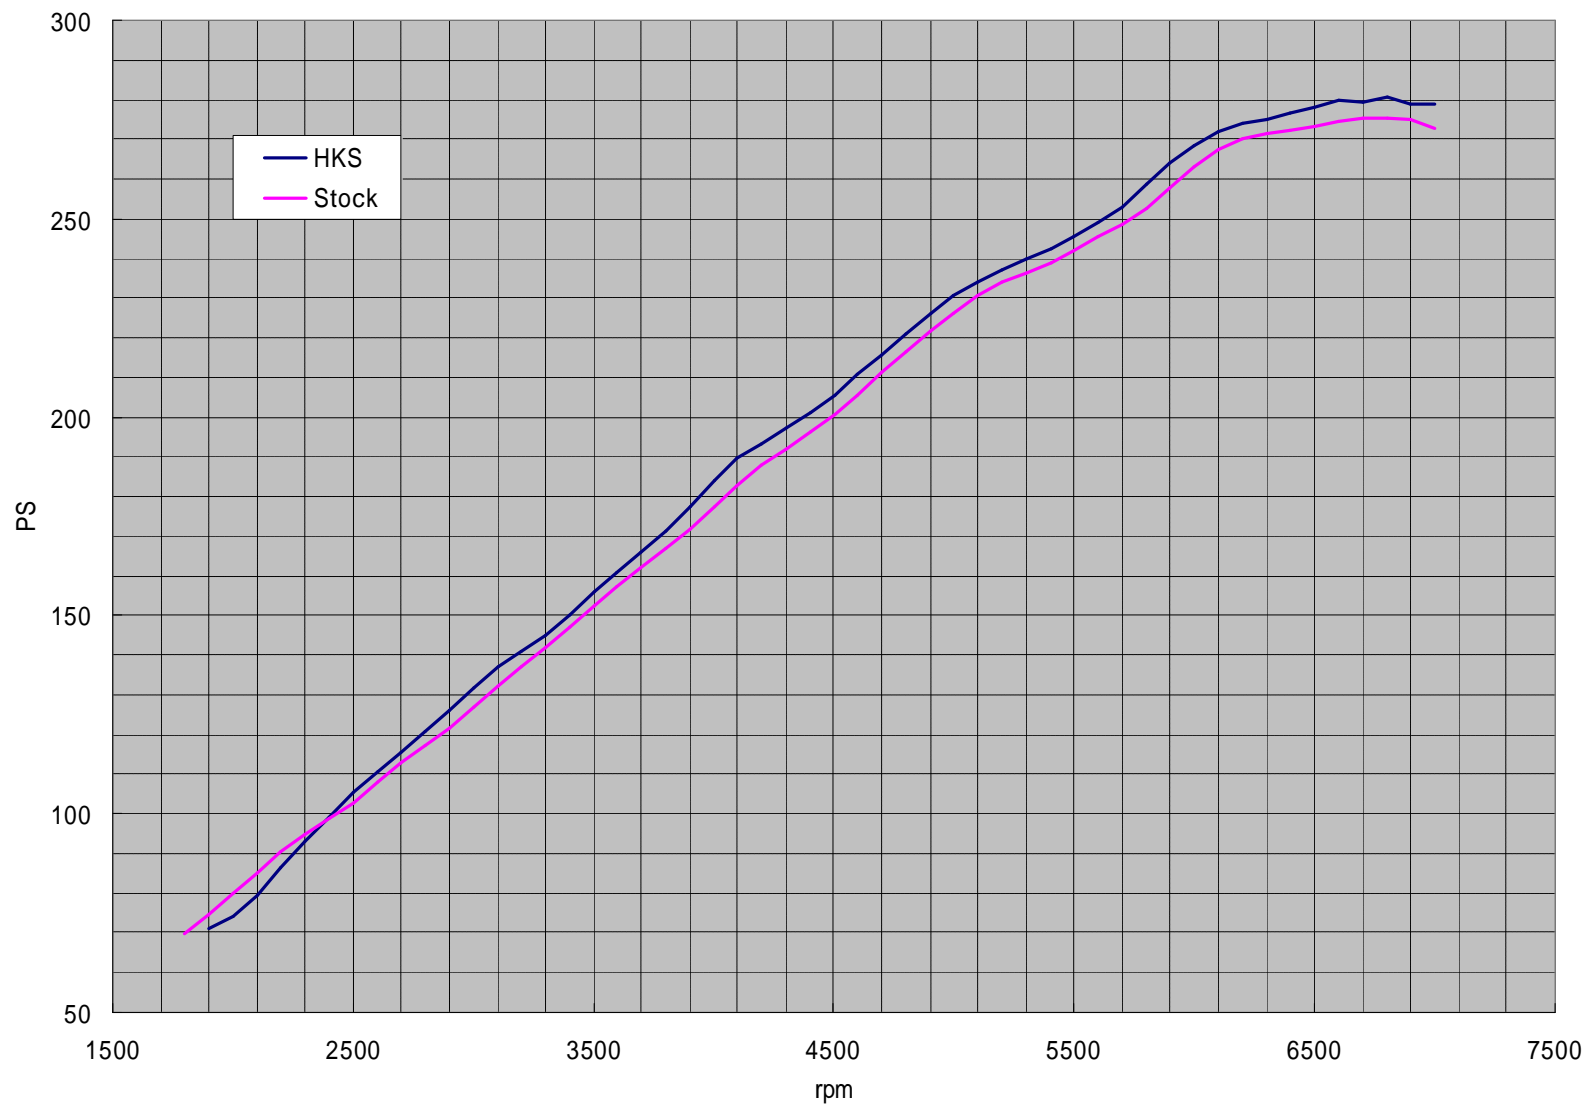

* Remarks
It does not fit to "V36 Skyline" as the layout is different.

Performance

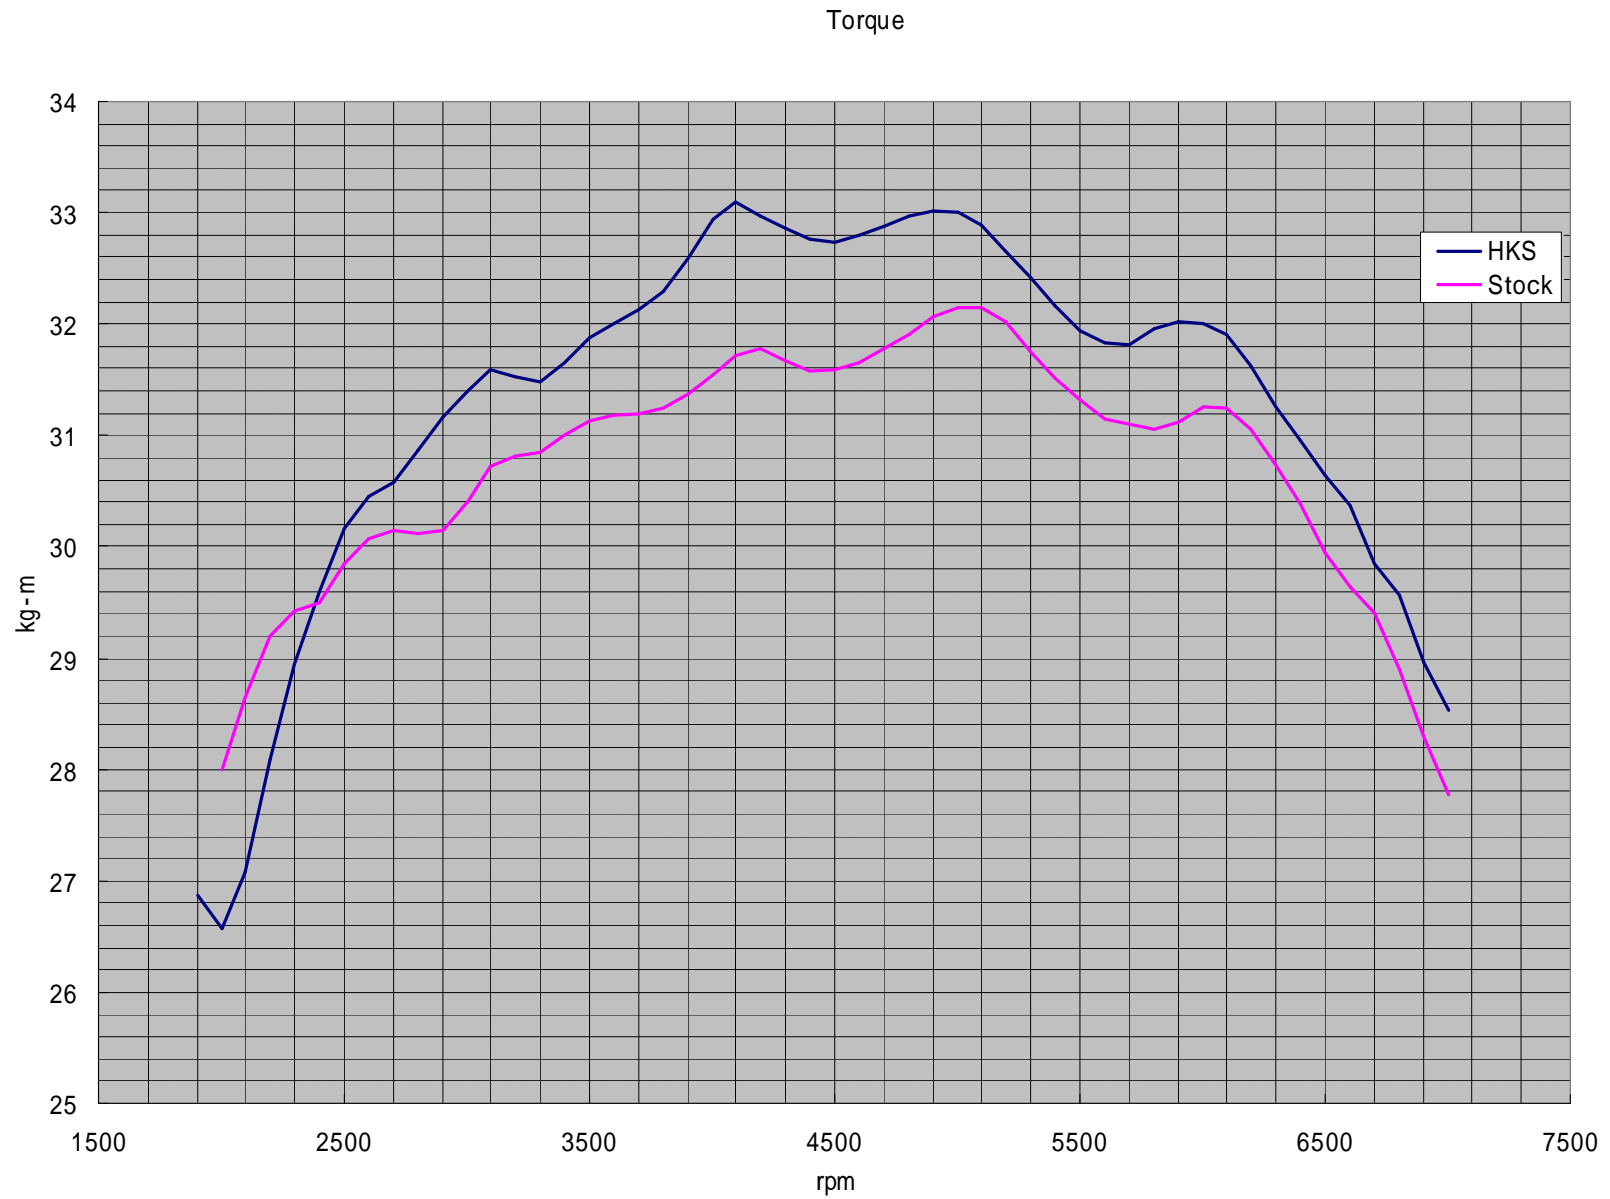

馬力特性

Horsepower

* With Full Dual Muffler (3rd Gear).

Torque

* With Full Dual Muffler (3rd Gear).

Sound level of exhaust

Full Dual Muffler + Metal Catalyzer (Close Sound Level)
