

**PERFECTLY MATCHED WITH ALL NISSAN BRAKE SYSTEMS.**

- Nissan Brake Fluid features a special high "boiling" point thanks to an extreme water lockout, which provides reliability to the function of the braking system.
- The excellent anti-oxidant properties ensure stable fluid quality and a long life. Even at low temperatures, Nissan Brake Fluid performs at a high level.
- Nissan specific brake fluid exceeds also several international standards, so that this brake fluid can be used in others carmakers' braking system. Other products with only these international specificities can potentially damage or reduce Nissan braking system performance.

# COOLANT RANGE

### DO NOT USE JUST ANY COOLANT.

- Cooling is essential to maintain characteristics for Nissan engine system. That's why, coolants recommended by Nissan meet the high specification that Nissan cooling systems require.
- Nissan has coolant formulas which are specifically developed for Nissan vehicles. Other coolants can potentially damage Nissan vehicles.
- For the new LCV range (Kubistar, Primastar, Interstar), the original D type coolant is required (please refer to the service literature).
- Coolants are available in a variety of packaging sizes (1L, 5L, 60L & 215L) which enable you to order the most appropriate volume to meet your requirements.
